## PROFILE

---

I am a final year Computer Science Engineering student specializing in Full Stack Development. I am enthusiastic about problem-solving and thrive in collaborative environments and want to apply my technical skills to contribute effectively to solve greater problem by means of software development.

## EDUCATION

---

<b>10th</b> <i>St. Anselm's North City School</i>	2018 Jaipur
<b>12th</b> <i>LNC Academy</i>	2020 Bikaner
<b>Bachelor of Technology, Computer Science Engineering</b> <i>NIIT University</i>	2025 Neemrana

## SKILLS

---

- Python
- Java
- MySQL
- HTML/CSS
- JavaScript
- Node.js
- Express.js
- ReactJS
- MongoDB
- Git/GitHub

## PROJECTS

---

<b>Sorting Visualizer</b> <i>Full Stack Development</i> A dynamic web app showcasing sorting algorithms through real-time visualizations. Built with MongoDB, Express.js, React.js, and Node.js, it allows users to observe and compare algorithmic efficiencies interactively.	05/2024
<b>Posture Detection &amp; Correction</b> <i>Research and Development Project</i> This project applies Deep Learning and Neural Networks to detect and analyze postures in yoga and gym exercises. Using models like MediaPipe Pose, it aims to provide real-time feedback on form and alignment for enhanced exercise safety and effectiveness.	05/2024

## CERTIFICATES

---

<b>PCAP: Programming Essentials in Python</b> Certification from Cisco Networking Academy	<b>Machine Learning Professional Certificate</b>
